

# - ET SOAK KURSUS

## 70-762 Developing SQL Databases

---

<b>Dato:</b>	5 certificeringsrettede kursusdage fra kl. 09.00 – ca. 16.00
<b>Lokation:</b>	Foldegade 33, 7100 Vejle
<b>Pris pr. deltager:</b>	Kr. 9.995,- ex. moms Prisen er inkl. kursusmaterialer samt forplejning. Eksklusiv certificering.
<b>Instruktør:</b>	Microsoft Certified Trainer Søren Agerbo
<b>PC:</b>	SOAK stiller PC og kursusmiljø til rådighed

---

### Course Description

#### About this course

If you want to be able to develop a Microsoft SQL Server database this is the course for you. In this course you learn how to use the features in the SQL Server and the tools needed to develop a database according to best practice. There will be plenty of hands-on and labs throughout the course and also shared experiences from “real life”. This course can be part of preparation for the Microsoft certification: 70-762: Developing SQL Databases

#### Audience profile

If you want to be highly skilled on SQL Server product features and technologies for implementing a database this is the course for you.

If you work as a developer and need the skills for the implementation of SQL Server databases, this is the course for you.

#### Prerequisites

- Basic knowledge of the Microsoft Windows operating system and its core functionality.
- Experience with relational databases.
- Experience with Transact-SQL.

#### At course completion

After the course, students should be able to:

- Design and Implement Tables.
- Describe advanced table designs
- Ensure Data Integrity through Constraints.
- Describe indexes, including Optimized and Columnstore indexes
- Design and Implement Views, Stored Procedures and User Defined Functions
- Respond to data manipulation using triggers.
- Design and Implement In-Memory Tables.
- Implement Managed Code in SQL Server.
- Store and Query XML Data.
- Work with Spatial Data.
- Store and Query Blobs and Text Documents.

## Course Outline

### Module 1: Introduction to Database Development

- Introduction to the SQL Server Platform
- SQL Server Database Development Tasks

### Module 2: Designing and Implementing Tables Designing Tables

- Data Types
- Working with Schemas
- Creating and Altering Tables

### Module 3: Advanced Table Designs

- Partitioning Data
- Compressing Data
- Temporal Tables

### Module 4: Ensuring Data Integrity through Constraints

- Enforcing Data Integrity
- Implementing Data Domain Integrity
- Implementing Entity and Referential Integrity

### Module 5: Introduction to Indexes

- Core Indexing Concepts
- Data Types and Indexes
- Heaps, Clustered, and Nonclustered Indexes
- Single Column and Composite Indexes

### Module 6: Designing Optimized Index Strategies

- Index Strategies
- Managing Indexes
- Execution Plans
- The Database Engine Tuning Advisor
- Query Store

### Module 7: Columnstore Indexes

- Introduction to Columnstore Indexes
- Creating Columnstore Indexes
- Working with Columnstore Indexes
- 

### Module 8: Designing and Implementing Views

- Introduction to Views
- Creating and Managing Views
- Performance Considerations for Views

### Module 9: Designing and Implementing Stored Procedures

- Introduction to Stored Procedures
- Working with Stored Procedures
- Implementing Parameterized Stored Procedures
- Controlling Execution Context

**Module 10: Designing and Implementing User-Defined Functions**

- Overview of Functions
- Designing and Implementing Scalar Functions
- Designing and Implementing Table-Valued Functions
- Considerations for Implementing Functions
- Alternatives to Functions

**Module 11: Responding to Data Manipulation via Triggers**

- Designing DML Triggers
- Implementing DML Triggers
- Advanced Trigger Concepts

**Module 12: Using In-Memory Tables**

- Memory-Optimized Tables
- Natively Compiled Stored Procedures

**Module 13: Implementing Managed Code in SQL Server**

- Introduction to CLR Integration in SQL Server
- Implementing and Publishing CLR Assemblies

**Module 14: Storing and Querying XML Data in SQL Server**

- Introduction to XML and XML Schemas
- Storing XML Data and Schemas in SQL Server
- Implementing the XML Data Type
- Using the Transact-SQL FOR XML Statement
- Getting Started with XQuery
- Shredding XML

**Module 15: Storing and Querying Spatial Data in SQL Server**

- Introduction to Spatial Data
- Working with SQL Server Spatial Data Types
- Using Spatial Data in Applications

**Module 16: Storing and Querying BLOBs and Text Documents in SQL Server**

- Considerations for BLOB Data
- Working with FILESTREAM
- Using Full-Text Search

**Module 17: SQL Server Concurrency**

- Concurrency and Transactions
- Locking Internals

**Module 18: Performance and Monitoring**

- Extended Events
- Working with extended Events
- Live Query Statistics
- Optimize Database File Configuration
- Metrics
